Why the Essex Motor Car will be the sensation for the coming season

Every part and every detail of the Essex construction is of proved worth. It was designed and built by some of the foremost engineers of America, the same men whose genius produced the Super-Six. Many points of superiority in the Super-six which have proved themselves in years of service, have been incorporated into the Essex. The engine, only twenty-nine inches long, cast in one block with detachable head, readily develops more than fifty horsepower. Long life is assured by the ample proportions of the counterbalanced crank shaft, supported by three large bearings.

"Men are sure getting wise to tobacco quality," says the tobacconist.

"Any kind of plug used to be good enough for most of them. Nowadays nearly everybody is beginning to learn about the real tobacco satisfaction of genuine Gravely Plug."

Good taste, smaller chew, longer life is what makes Genuine Gravely cost less to chew than ordinary tobacco.
